With an introduction by Professor David Donnison and writer broadcaster Kay Carmichael, Five Last Acts is the major, long awaited volume from the organisation that pioneered self deliverance and brought you Departing Drugs.

"I have just finished reading your most excellent book, *Five Last Acts*; it is so well-researched, so informative, so clear, that it leads me to ask this question: which rational person would not want to obtain a copy of this book as an insurance policy against an uncertain future?"

Chris Goodwin, Staffordshire

"An invaluable little book which answers a host of possible questions. Timely preparations are stressed and described. I found the chapters on Helium and Compression particularly enlightening, as were the diagrams. The bibliography and references are also most helpful."
